

Insert values into database

```
Imports System.Data.OleDb

Public Class Form1
    Dim con As OleDbConnection
    Dim adt As OleDbDataAdapter
    Dim cmd As OleDbCommandBuilder
    Dim ds As New DataSet()
    Dim s As String
    Private Sub Form1_Load(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles MyBase.Load
        con = New OleDbConnection("Provider=Microsoft.Jet.OLEDB.4.0;Data Source=C:\Users\LAB - 2 PC - 20\Desktop\mmp12.mdb")
        con.Open()
        adt = New OleDbDataAdapter("select * from table1", con)
        adt.SelectCommand.CommandText = "select * from table1"
        cmd = New OleDbCommandBuilder(adt)
        adt.Fill(ds, "table1")

        End Sub

    Private Sub Button1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs) Handles Button1.Click
        Dim newrow As DataRow = ds.Tables("table1").NewRow
        newrow("ID") = TextBox1.Text
        newrow("name") = TextBox2.Text
        newrow("branch") = TextBox3.Text
        ds.Tables("table1").Rows.Add(newrow)
        adt.Update(ds, "table1")
        MessageBox.Show("record added successfully")
    End Sub
End Class
```

(Steps :

first ms access create database
Add database in application
Use connection string properly

Here used two commands so instead of command use command builder)
